

I respectfully urge you to reject NAB petition 04-160 and support XM. It's terrible that you are allowing the lobbyist to try squash the first amendment for the Xm industry. They provide an invaluable service to commuters that cannot get instant traffic and weather from their local stations because they are full of idiot DJ's doing nothing but talking when they need to be telling us where the bad spots in our commute are. I travel about 40 minutes each way to work and then home and instant traffic is a god send on some days.
